e-GOVERNANCE ANNUAL REPORT (2021-2022), KARIMGANJ COLLEGE.

e-Governance is implemented in the following areas STUDENT ADMISSION: The admission software of Kareng Technologies was functioning well but college faced some problems due to the fact that the company was functioning from Guwahati and it was always not possible for them to send representative to Karimganj for rectification of issues faced by the college. In many cases the students faced problems due to delay in correction of the small issues faced by them. In view of this college decided to go with the Exabyte Solution, the company which was providing Accounting and Fees collection softwere since 2005. In the year 2021 the college purchased online admission software named Karimganj College Admission Portal from the same vendor. EXAMINATION: During the Covid 19 pandemic in 2021, Jahangir Alam, a final-year student, developed an innovative online payment portal under the supervision of Dr. Sudip Suklabaidya, Assistant Professor in the Department of Computer Science and Application at Karimganj College. This system addressed a significant gap in the examination fee payment process. Designed specifically for students appearing for sixth-semester examinations, this portal marked a substantial improvement over the existing manual processes, which required physical visits to the college. Prior to this development, Assam University-affiliated colleges lacked an online portal for examination fee payments. This inefficiency was particularly burdensome during the pandemic when mobility was restricted. The system enabled secure, efficient, and remote payment capabilities, generating instant digital receipts for confirmation. This trailblazing effort not only streamlined the examination fee submission process but also enhanced the overall student experience by reducing physical contact and making the process more convenient and time-saving. The college provided CC TV camera to all Examination Halls. Automated examination form filling Import of marks of online Internal assessment. Online display of marks on student login The department of Computer Centre of the college developed system for online examination

ACCOUNTS: 'Financial management using the Software purchased from Exabyte solutions. Transaction under DBT fund has been done using PFMS system. ADMINISTRATION: In 2020, after announcement of lock down due to Covid 19 pandemic, Murshed Ahmed, a final year student of Computer Science and Application, developed an online teaching platform entitled "Karimganj College Online Platform" under the supervision of Dr. Sudip Suklabaidya for the TDC students of Karimganj College. This platform was designed to facilitate the continuation of classes for students across all three-degree streams—Arts, Science, and Commerce. The primary objectives of the platform was to ensure uninterrupted teaching -learning, enhance student engagement, and provide a versatile learning environment. The system offered a comprehensive solution for remote education, featuring virtual classrooms, interactive sessions, and digital resource sharing. It enabled faculty to conduct live lectures, upload study materials, and assess student performance through online notes and assignments. The platform's user-friendly interface and robust features ensured seamless transition to online learning, maintaining the academic schedule despite the

and educators by fostering real-time communication and feedback. It included features such as discussion forums, virtual office hours, and collaborative tools to encourage active participation and collaboration among students. By providing a resilient and adaptable educational infrastructure, the online teaching platform set a new standard for academic continuity and innovation in the times of crisis. The platform remains active, allowing students and teachers to access it whenever needed. Library management system on SOUL software
